

Minutes from "1BIG" meeting on 10/2/17

The meeting started at 6:30 pm in the Witherell Room at the Burke Mountain Hotel and Conference Center with everyone doing a short introduction of themselves.

The group talked about the possibility of creating a new fire district in West Burke or expanding the current one that is in East Burke. Kevin looked up info on fire districts and said that he would forward to everyone in the group so that we could read up on them and understand them better.

It was discussed that we would start off focusing on doing a Town wide survey to see what residents had currently for water, wastewater and internet service and see if what they currently had was adequate for their usage or if upgrades were needed. Another part of the survey was to ask if residents were interested in joining a fire district. During the discussion Dan had started a survey template and Erik volunteered to take it over doing some research on other towns that had put out similar surveys. Erik was also going to approach the Town Select board and current Fire District located in East Burke to ask for approval to do the survey and ask for any additions that they would like to see on it. Erik said he would let us know of his progress via email.

Meeting was adjourned at 8:15pm.
